Inherent risks

of poor contract lifecycle management

Lost Contracts

With a single source of truth missing, contracts can get lost in email threads and spreadsheets.

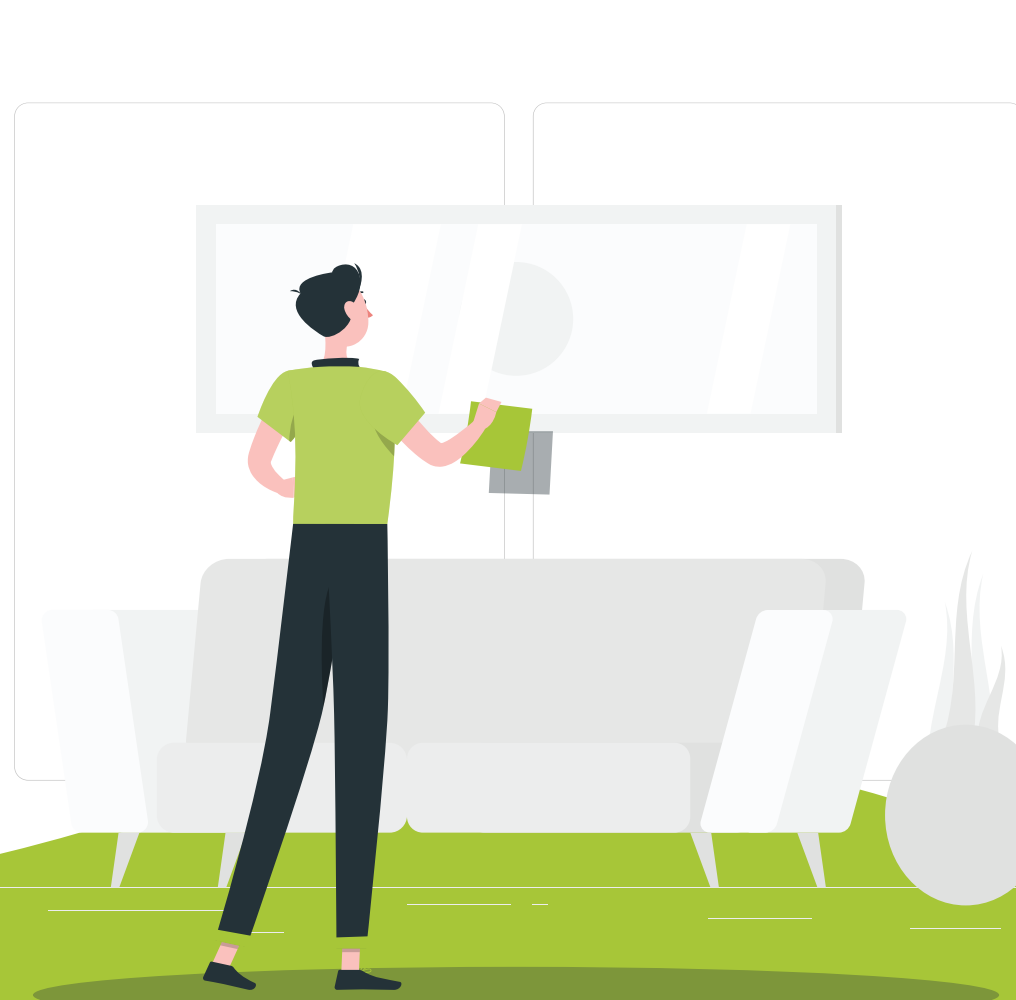

Chaotic Workflow

Unoptimized agreement workflows reduce success levels of a contract and cause delays especially during deadlines.

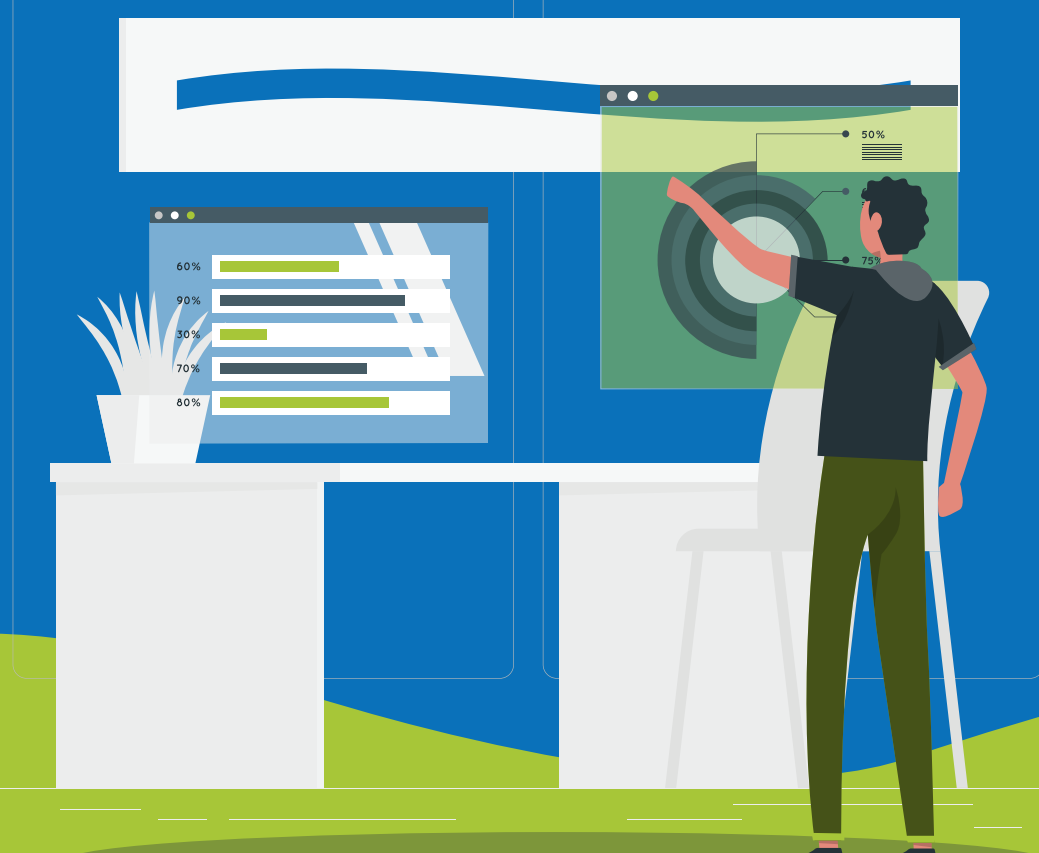

Lack of standardization

Non-standard clauses like non-compete or force majeure can make their way into contracts leading to added pressure on legal teams.

Contract Breach

A contract breach, even when accidental can lead to possible litigation.

Casual Access Controls

Casual contract controls can lead to mishandling of classified information and get down to data theft.

Failed Compliances

Financial losses, security breach, license revocation, and business disruptions can all be caused due to failed compliances.
